Aided
Excellence

Enhance communication- Transfer Know-how- Empower your team

SIMuSPACE serves as an open and powerful platform tool with integrated workflow designer for process automatization and data management for the simple storage of your scripts and other crucial data.

Increased efficiency

- ✓ Optimize your resources
- ✓ Simplify and automate your entire simulation process
- ✓ Save time by standardizing repetitive tasks

Cooperate worldwide

- ✓ Share projects worldwide
- ✓ Benefit from a global data structure & storage
- ✓ Easy handling of processes and data across multiple locations

Add. feature

- ✓ Webbased userinterface
- ✓ Rich Client for Windows and Linux
- ✓ Interfaces to 3rd party software or any kind of hpc system

One System-Two solutions

Workflow Manager

- ✓ Standardization of any complex process is possible
- ✓ Create workflows via drag & drop from predefined workflow elements
- ✓ Pass workflows to your team and save time by executing processes automatically
- ✓ Versioning system and lifecycle of workflow templates
- ✓ Roles and permission handling can be defined

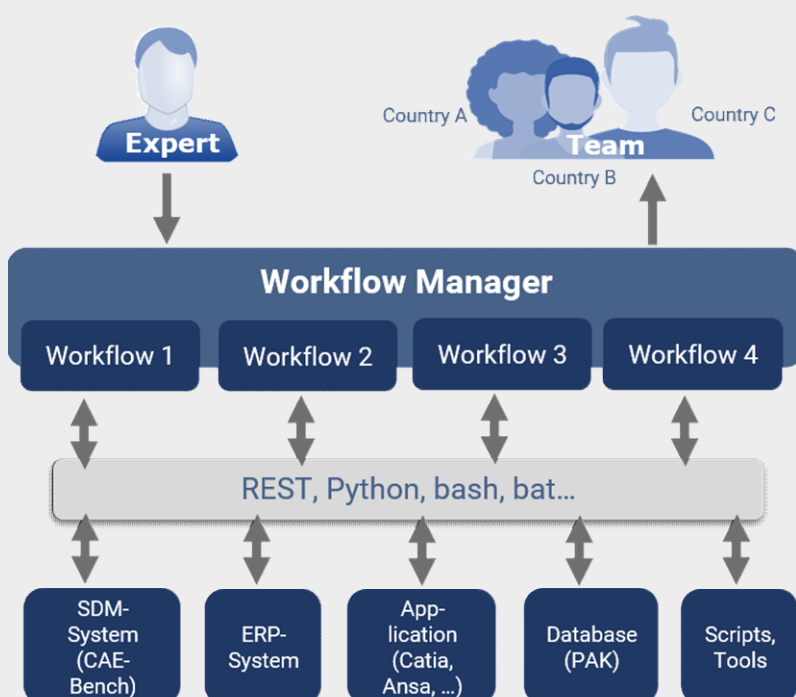

Data Manager

- ✓ Upload, sharing, management, storage & search of your entire data/projects
- ✓ Easy tracability of all objects in the system
- ✓ Enables local work on workstation and individual server sync
- ✓ Opening of files with preconfigured third-party applications directly in the system
- ✓ Extensive customization of dataobjects and different data types
